Question No: 9

Multi Choice Type Question

Common content

Read the passage and answer the following questions:

Today, large parts of the population feel that business has become detached from society, and that business interests are no longer aligned with societal interests. It is not enough to say that business has been discredited by the behaviour of some greedy or even fraudulent CEOs, and that tightening the rules will demonstrate that the majority of business leaders are trustworthy. What has come under attack is the credibility not only of business leaders but of business itself, or in other words, of our market-driven system.

This is a paradox. The welfare of all people can be increased only if we use available capital and human resources in the most efficient way. Free markets, democracy, transparency, global interaction and entrepreneurship are the only way to boost economic progress and social development. Yet many people are longing now for different solutions. There has been a proliferation of simplistic, populist voices condemning our capitalist system as cold and inhumane. At a time of corporate scandals and economic stagnation, those voices find fertile ground not only among the traditionally left-out minorities, but increasingly among large parts of the middle class.

This middle-class moroseness can be explained by the sudden fear people feel for their future. The capital stock has shrunk, retirement benefits no longer seem secure, health costs increasingly eat away at income and job security is fading even for the well trained. In some ways this movement against the system has already infected whole nations: in Latin America, several countries are now governed by presidents who are at odds with the fundamental driving factors of our free-market system.

The only way to stop this new wave of antibusiness sentiment is for business to take the lead and to reposition itself clearly and convincingly as part of society. Business needs to propagate - and live up to - a new philosophy that I would call "society-oriented business

Question

According to the passage, economic progress and social development can be achieved by all the following except

- ☐ free markets.
- ☐ democracy.
- ☐ transparency.
